East Central Indiana Robotics – COVID-19 Policy

With our robotics shop opening back up in Matthews we have come up with guidelines for how we will handle team member safety during these uncertain times.

1. If you are not feeling well then DO NOT come in! If you have tested positive or are currently in the testing phase then DO NOT come in! If you have been exposed to or in close contact with someone who is or has tested positive for COVID-19 then DO NOT come in! Please follow current CDC guidelines and isolate for 10-14 days.
2. We have plenty of hand sanitizer at the shop so please use it. Please remember to wash your hands with soap regularly.
3. We have plenty of disinfectant spray and disinfecting wipes and will be cleaning the shop on a regular basis.
4. Facemasks are not required, but are highly recommended. Feel free to bring your own mask to use if you prefer. We do have a supply of disposable masks at the shop if needed.
5. For those that are working on computer keyboards we have a supply of disposable non-latex gloves that are available for use.
6. Once you are in the shop please remember to social distance yourself as much as possible.

Everyone's safety is our main concern. Please use common sense and stay safe so we can have another awesome robotics season!
